

## XiGo Nanotools Appoints **Dias de Sousa S.A. as New** Distributor in Portugal

For Immediate Release

**Bethlehem, PA, June 22, 2011:** XiGo Nanotools announces the appointment of Dias de Sousa SA, as its exclusive authorized representative for Portugal, effective immediately.

XiGo Nanotools is a technology company that provides innovative solutions to help scientists better understand nanoparticle structure and is the only company which utilizes NMR technology for particle surface analysis. Compared to traditional methods, XiGo is considerably more cost **effective** and requires no maintenance. It delivers highly reliable testing results and is able to analyze undiluted liquids, taking less than 10 minutes where traditional methods take several hours. XiGo's major application areas include pharmaceuticals, energy storage, milling and grinding, cosmetics, paints, electronics, and cements.

Dias de Sousa **S.A.** is a well known provider of analytical instrumentation (**sales and service**) in Portugal, with a broad range of scientific instruments complementary to XiGo's technology.

Sean Race, President of XiGo Nanotools, says: "We are delighted to add Dias de Sousa **S.A.** to the XiGo distribution team. They are a well known provider of instruments, with a team of sales and support professionals in this region without equal. We look forward to a long and prosperous relationship."

**Pedro Laranjeira, Managing Director of Dias de Sousa S.A., says: "We are very proud to be chosen by XiGo Nanotools as their exclusive distributor for Portugal. We deeply believe that XiGo's technology and expertise along with our in-house knowledge, will bring further analytic and scientific benefits to the Portuguese market, both in the public and private sectors, either in QC and R&D domain."**
