XiGo Nanotools Appoints New German Distributor

For Immediate Release

Bethlehem, PA, February 14, 2010: XiGo Nanotools announces the appointment of **Particle Metrix GmbH**, Meerbusch, as its authorized representative for Germany, Austria, and Switzerland, effective immediately. **XiGo Nanotools** is a technology company that provides innovative solutions to help scientists better understand nanoparticle structure.

Xigo's European Business Manager Keith Sanderson says "Particle Metrix is one of many new distributors that Xigo Nanotools will appoint in Europe this year. The European market is very important for us and to have a solid reliable presence in Germany will increase our visibility, Particle Metrix will also support customers in Austria and Germanic Switzerland"

Particle Metrix is a well known provider of instruments to measure nanoparticles. Their **Stabisizer** and the **ZetaView**, instruments to measure particle charge, represents a portfolio of products that complements our **Acorn Area**, the fastest measurement of nanoparticle surface area available.

Says Sean Race, President, "We are delighted to add **Particle Metrix** to the **XiGo** distribution team. The synergy between our respective product lines is clear. We are excited to have such a strong team of experienced particle characterization specialists such as Dr. Hanno Wachernig and Ms. Margret Böck supporting our European customers. "

Please contact **Particle Metrix** at the following address for more information:
